

**Instructions for all accepted Technical Notes; detailed instructions are provided during the final submission process after logging in at:**

**<https://css.paperplaza.net/journals/tac/scripts/login.pl>**

**All authors of accepted Technical Notes need to upload the following file:**

- PDF file of your final paper. Please note that the final paper should be in the TAC page (2-column) format for Technical Notes and the PDF file should include all figures properly numbered, captioned, and placed in the manuscript.

**In addition the following files need to be uploaded together through a zipped file:**

- 1) TeX (or Word) file of your final paper.
  - 2) Additional files that your TeX file requires to be properly compiled (e.g., bib files or files with your own commands, graphics packages, etc).
  - 3) Files of any figures in your paper (normally eps format).
- Make sure your files are self-contained, i.e., that there are no pointers to your system setup.
  - Check that your files are complete. Include: abstract, text, references, footnotes and figure captions.
  - DO NOT put the files in a page layout software (Ventura, Quark, Pagemaker, FrameMaker). Write the text down to an ascii format.
  - DO NOT create special macros. Use the standard code provided by the program.

## SOFTWARE

For the most accurate and efficient processing of your manuscript, especially those containing extensive mathematics, use TeX, LaTeX, or Troff programs. Include macros used with files. If possible, set manuscript column size to 21 picas (3 1/2 inches wide).

Instructions for obtaining an IEEE LaTeX style file can be obtained from the *Transactions* web site at **<http://control.bu.edu/ieee/information.html>** or by e-mailing: **[help@ep.ieee.org](mailto:help@ep.ieee.org)**

Manuscripts developed using other software like WordPerfect or Word programs are acceptable, but the mathematics will very likely be rekeyed into a TeX format at IEEE. If none of these programs are available, send all text aspects of the manuscript in ASCII format as well.
